

How to use the Integrations marketplace in Altegio

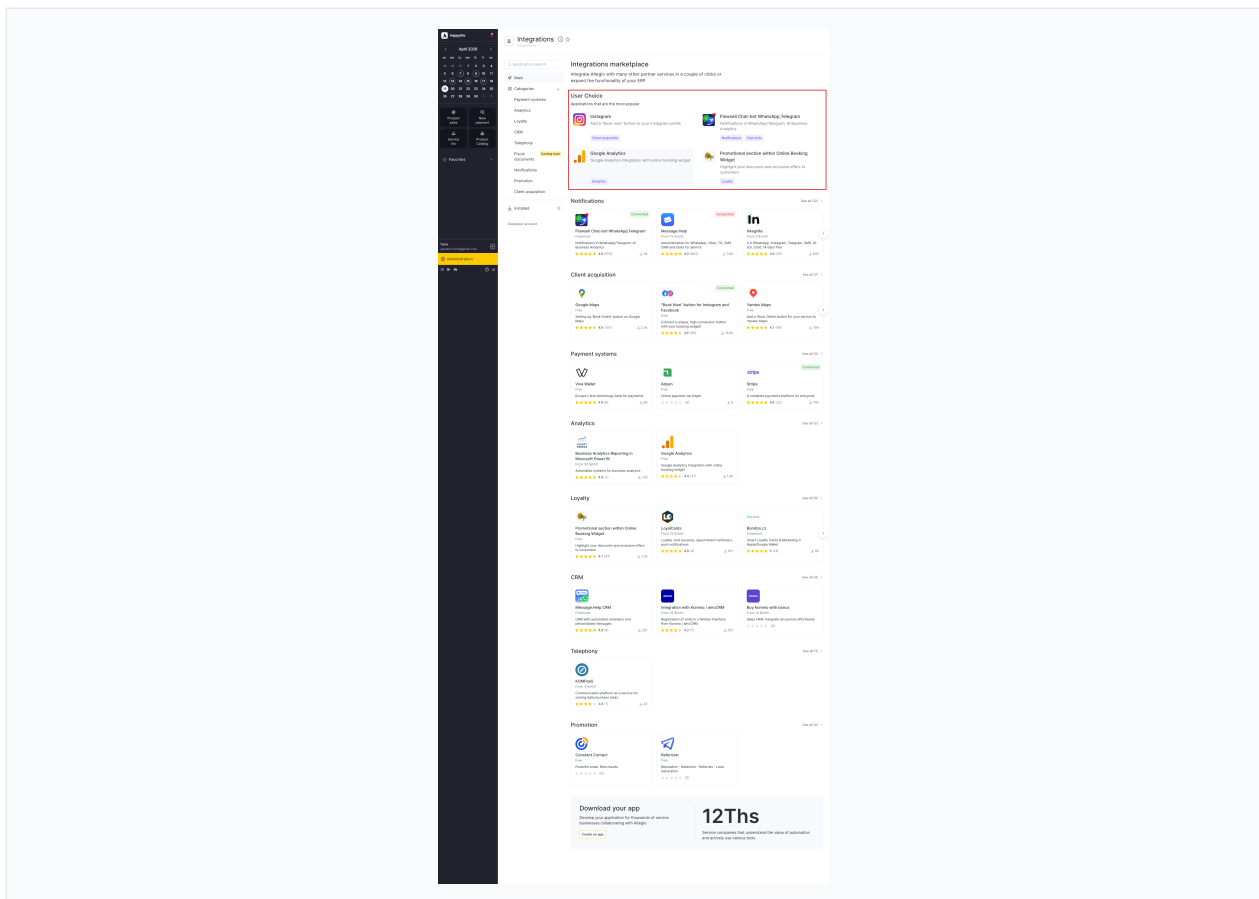

The Integrations marketplace is a built-in catalog of partner applications that extend Altegio with payment processing, notifications, analytics, CRM, loyalty programs, client acquisition tools, and more. Browse the catalog, connect an integration in a few clicks, and manage every installed application from one page.

How to open the Integrations marketplace

1. Switch to **Administration** mode using the yellow button in the bottom-left corner.
2. Open **Integrations** from the left menu.

The page opens on the **Main** tab. On the left, an **Application search** field and a **Categories** menu filter the catalog. On the right, the **User Choice** section highlights the most popular applications, followed by a preview strip for every category.

Page layout

The Integrations page has five working areas in the left menu:

- **Application search** — a text field at the top of the side menu. Start typing to filter applications by name across all categories.
- **Main** — the catalog overview with **User Choice** and category previews.
- **Categories** — a collapsible list of nine categories. Click any category to open its full grid.
- **Installed** — a counter shows how many applications are currently connected to your account. Click to see every installed application on one page.
- **Developer account** — a link for businesses that want to build their own integration and publish it to the marketplace.

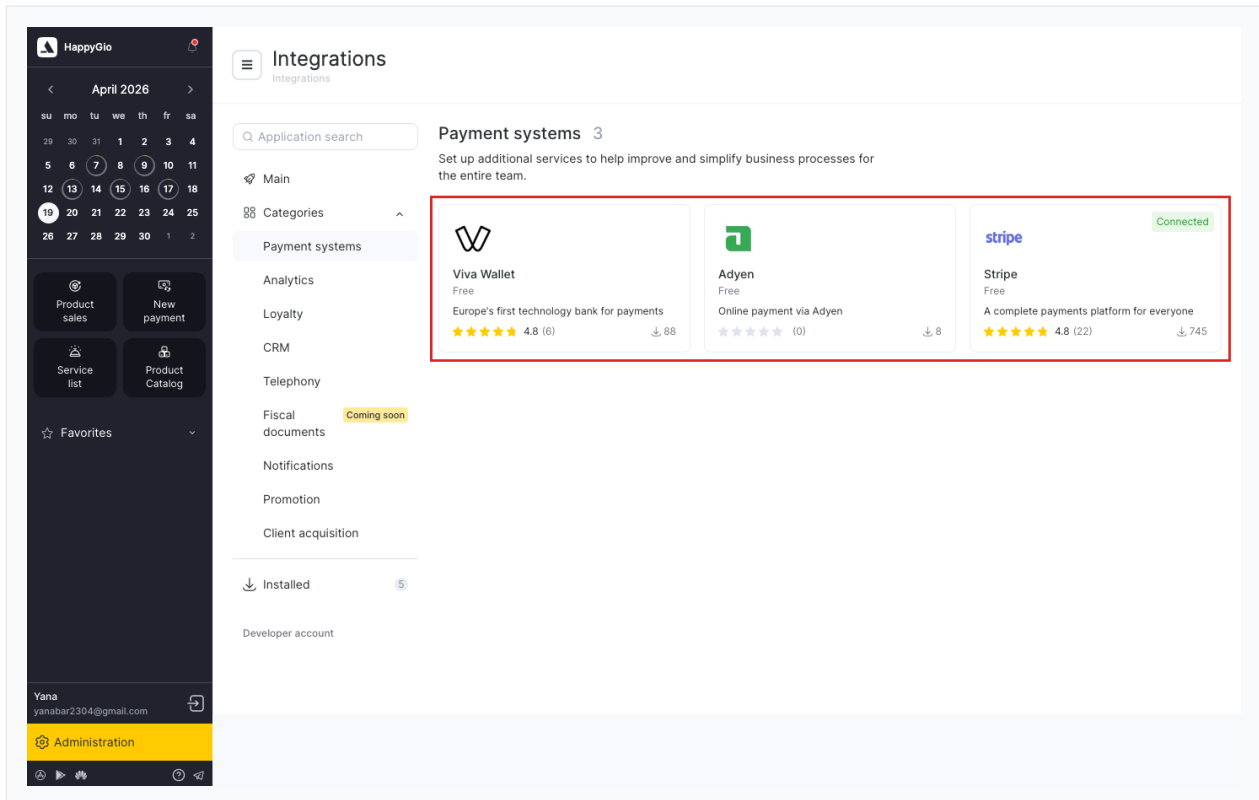

Available integrations

The marketplace contains 35 partner applications in nine categories.

Payment systems

Accept online payments from clients and settle card payments in the salon.

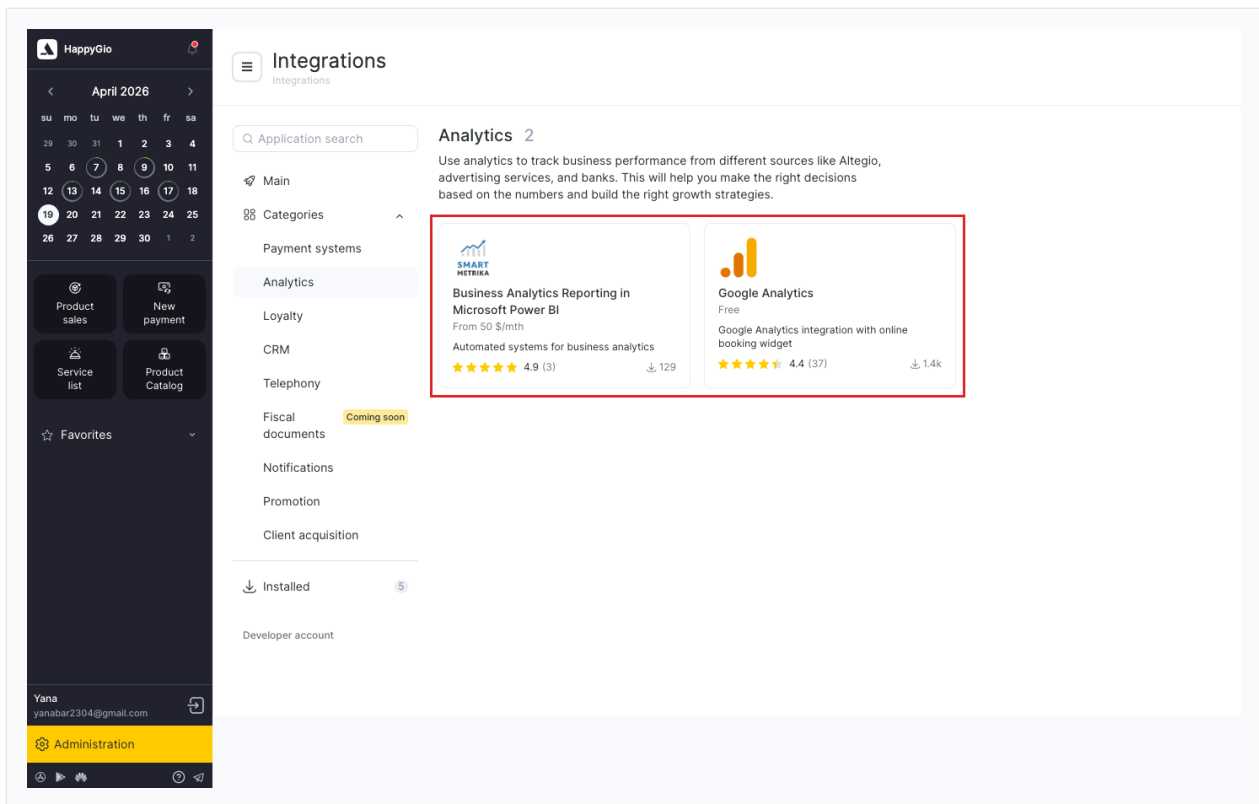

- **Viva Wallet** — Free
- **Adyen** — Free
- **Stripe** — Free

Analytics

Measure booking performance and send data to external reporting tools.

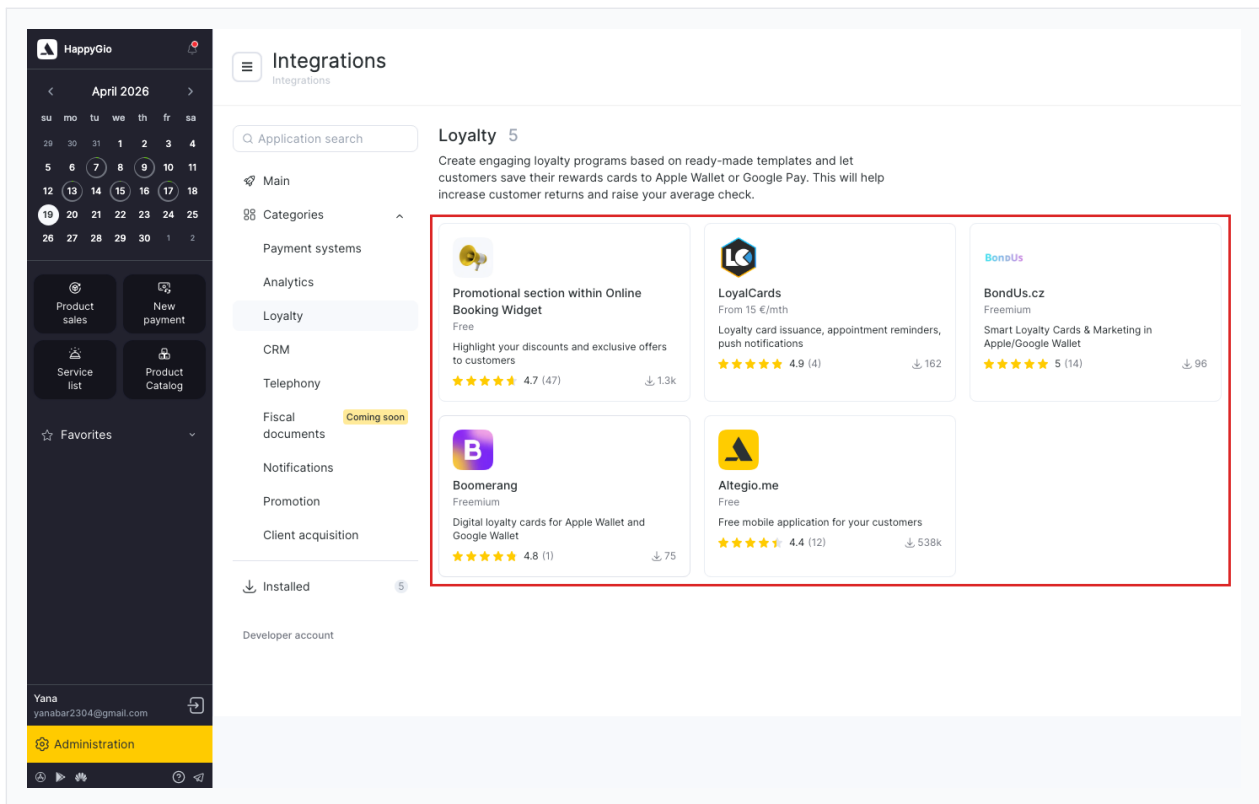

- **Business Analytics Reporting in Microsoft Power BI** — From 50 \$/mth
- **Google Analytics** — Free

Loyalty

Run loyalty cards, wallet passes, and promotional banners on the booking widget.

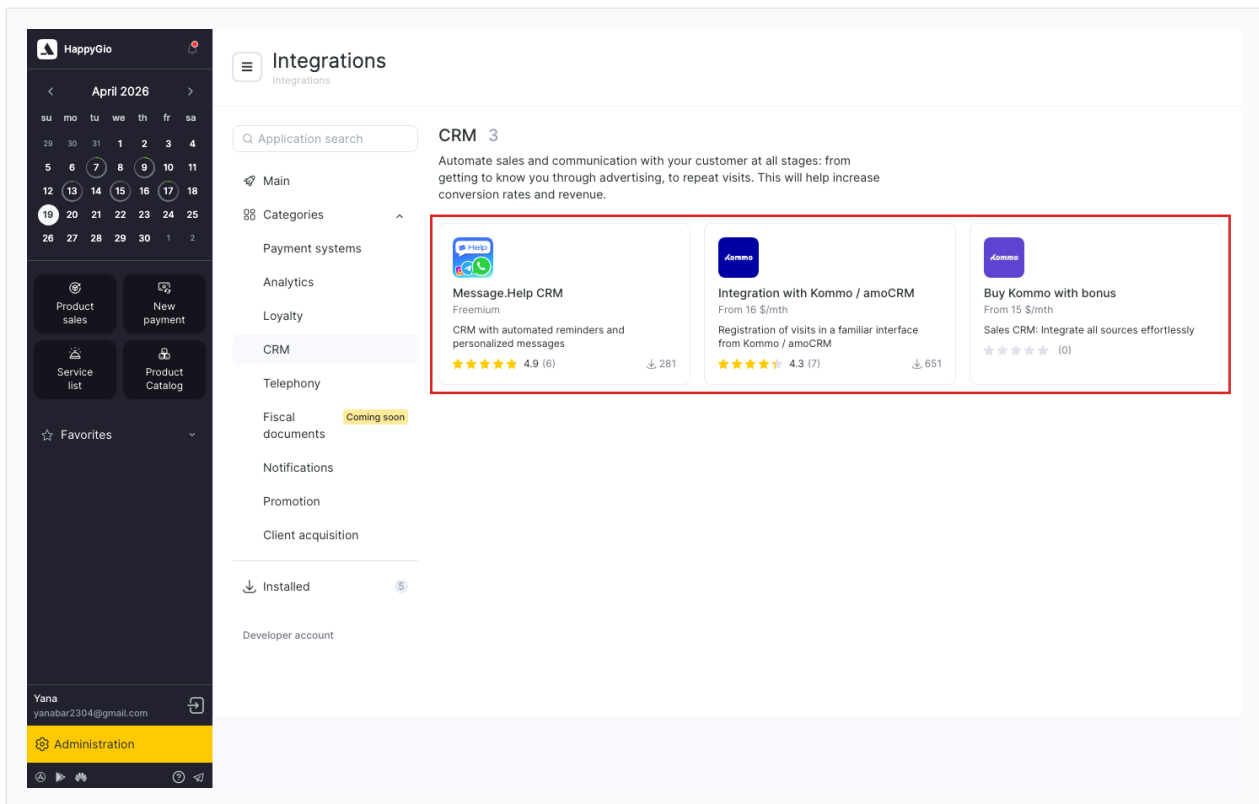

- **Promotional section within Online Booking Widget** — Free
- **LoyalCards** — From 15 €/mth

- WhatsApp Business (with Coexistence) — Free

Promotion

Run email campaigns and reputation-marketing programs.

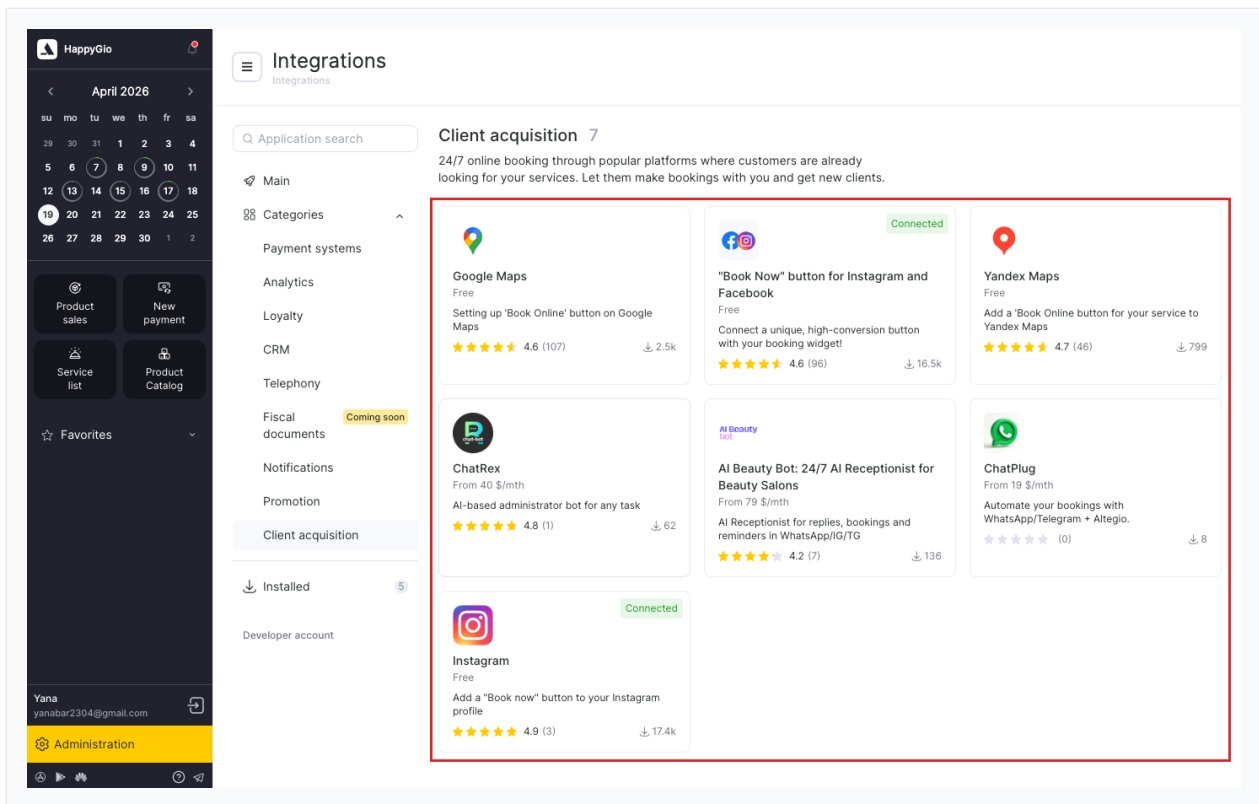

- Constant Contact — Free
- Referrizer — Free

Client acquisition

Add a **Book now** button to your Instagram, Facebook, Google Maps, and Yandex Maps listings, or plug in an AI receptionist to accept bookings through chat.

- **Google Maps** — Free
- **"Book Now" button for Instagram and Facebook** — Free
- **Yandex Maps** — Free
- **ChatRex** — From 40 \$/mth
- **AI Beauty Bot: 24/7 AI Receptionist for Beauty Salons** — From 79 \$/mth
- **ChatPlug** — From 19 \$/mth
- **Instagram** — Free

How to read an integration card

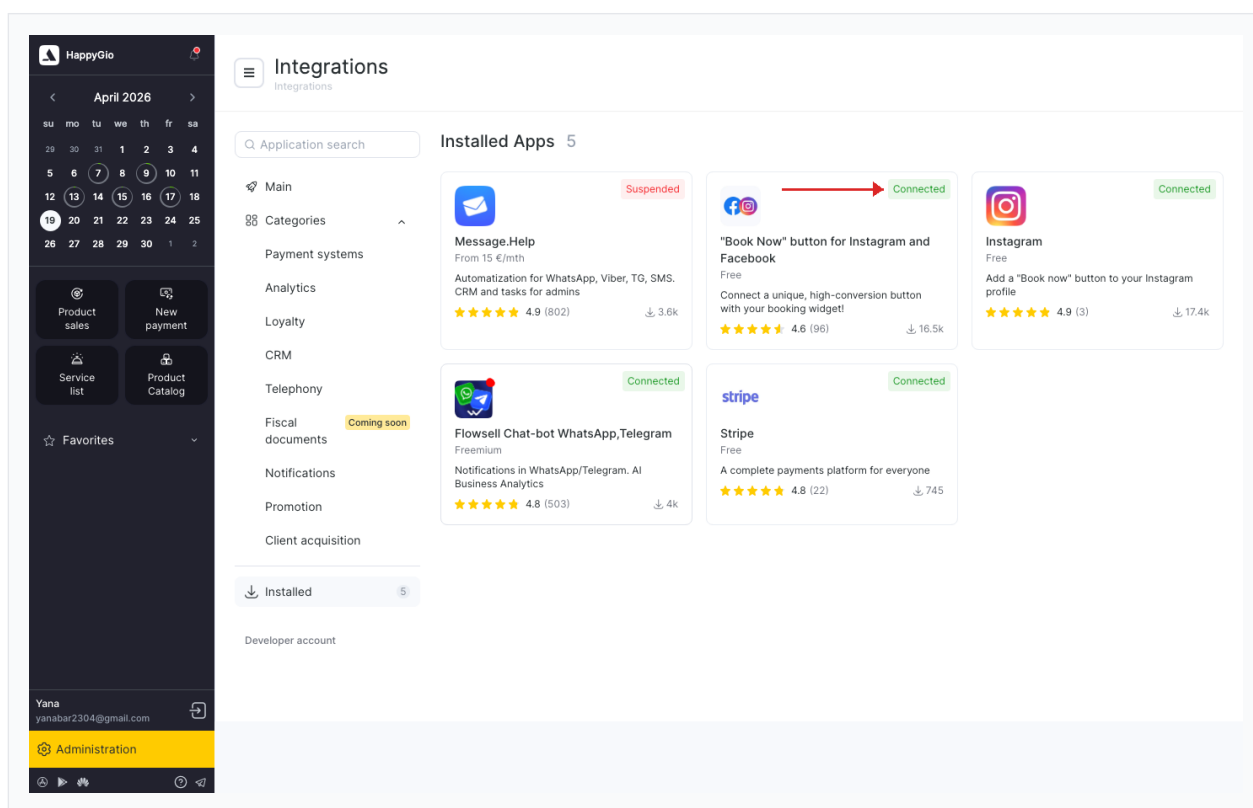

Every card in the catalog follows the same format:

- **Logo** in the top-left corner.
- **Status badge** in the top-right corner — shown only when the application is already installed:
 - green **Connected** badge if the integration is active.
 - red **Suspended** badge if the integration is paused (for example, because the trial or subscription has ended).
- **Application name**.
- **Price tier** — Free, Freemium, From N €/mth, or From N \$/mth.
- **Short description**.
- **Rating** — stars and review count.
- **Download count** — how many Altegio locations have installed the application.

How to connect an integration

Every integration in the marketplace uses the same connection flow.

1. Find the application you want — browse a category, scroll the **User Choice** strip, or type the name in the **Application search** field.
2. Click the card to open the integration detail page.

3. Review the information on the detail page. The header shows the logo, application name, short description, rating, download count, and developer. The **Information** tab contains promo screenshots, an **About this integration** description, and a **Features** list. The **Reviews** tab shows feedback from other Altegio users.
4. Check the **Price** box on the right. For applications priced **Free** or **Freemium**, a yellow **Connect** button appears. For some third-party applications (for example, **Viva Wallet**), the button reads **Go to website** and takes you to the partner's site to finish setup.
5. Click **Connect**.
6. Follow the authorization steps shown by the partner. The specific flow differs per application — Google applications ask for a Google account, payment providers ask for a merchant account, chat bots ask for a phone number or channel ID.
7. After authorization finishes, return to Altegio. A green **Connected** badge appears on the application card and the application is added to the **Installed** list.

About this integration

Thanks to the integration of VivaWallet and Altegio, our clients now have the opportunity to easily and quickly handle advance payments for online bookings, as well as the online sale of passes and vouchers. Receipts after successful payments will be issued immediately, thus increasing customer convenience and reducing no-shows.

Reasons why is this good for you business:

- * Prevent Cancellations: Enforce mandatory prepayments to reduce cancellations and secure revenues.
- * Optimize Staff Utilisation: Increase bookings for premium services or top specialists to maximize profitability.
- * Boost Seasonal Profits: Utilize prepayments during peak times to ensure full booking capacity.
- * Simplify Administration: Online payments free up staff for better customer engagement

- Click any card on the **Installed Apps** page to open the integration detail page, where you can manage its settings or disconnect it.
